

FIRST YEAR SEMINAR (FYSM)

Courses

FYSM 1000 (3) First Year Seminar

Provide first year students with an immersive experience in an interdisciplinary topic that addresses current issues including social, technical and global topics. Taught by faculty from across campus, the course provides students with an opportunity to interact in small classes, have project based learning experiences and gain valuable communication skills. Seminar style classes focused on discussion and projects.

Requisites: Restricted to freshmen (0-26) Exploratory Studies (XXES) students only.

FYSM 1100 (3) First Year Interest Group Seminar

Creates a First Year Interest Group by linking a small first-year seminar with an existing introductory course on a related topic. Each seminar section will be linked to a different course and students in that FYSM 1100 section must be registered for that course. There will be a different co-requisite course for each seminar section.

Requisites: Restricted to students with 0-26 credits (Freshmen) only.

Grading Basis: Letter Grade

FYSM 1200 (3) First Year Seminar Global Experience

Offers a first year seminar experience with an international education component. This course consists of a first year seminar taught during the semester, plus a mandatory 1-week trip abroad. Seminar topics and international destinations vary for different sections of this course and not all topics are offered every semester. Additional fees may be required for participation in this course. Please consult the First Year Seminar Program and International Education for information on topics, destinations, requirements, schedules, fees and other details.

Requisites: Restricted to students with 0-26 credits (Freshmen) only.

Grading Basis: Letter Grade

FYSM 2200 (1) Design Thinking Seminar: Using Design Thinking to Create Your Brand and Share Your Story

The Design Thinking Seminar introduces students to the principles of the design thinking framework and its application toward solution development and personal brand building. In this course students will participate in interactive and hands-on sessions to develop their own story, understand community needs, and create tangible solutions. Students will acquire a strong understanding of the design thinking framework, a deeper sense of their personal passions, and tools to craft their own path at CU and beyond. Department enforced requisite: Students must be enrolled in the Design Your Path Living Learning Community.
